

## DECARE DENTAL INTERNATIONAL EXPATRIATE DENTAL PROGRAM

The need for quality dental care is universal. That's why when your employees live and work outside the United States, DeCare Dental has them—and their dependents—covered.

The International Expatriate Dental Program provides comprehensive dental benefits to employees of American companies who work abroad. American employees transferred overseas can receive dental plans administered like their stateside coworkers. Multinational employers enjoy the ease of running their entire dental benefits program through a single administrator.

### WORLDWIDE ACCESS TO CREDENTIALLED DENTISTS

The International Expatriate Dental Program uses dentists located throughout Europe, Africa, South America and Asia and in most desired travel destinations throughout the world. All participating dentists are credentialed, speak English and meet the licensing requirements in their home countries. The list of participating dentists is available on our Web site at [www.decare.com](http://www.decare.com).

### EASY FOR EMPLOYEES TO USE

Employees will receive a detailed manual of how to use the International Expatriate Dental Program. Basically, if employees need dental care while working internationally, they call our international service center. An English-speaking customer service representative will assist them with finding a dentist, but subscribers are responsible for scheduling an appointment.

Employees pay their dentists directly, then submit a simple claim form to the International Expatriate Dental Program office either electronically, by fax or by mail. DeCare Dental then reimburses them according to the specific provisions of their benefit plan.

### EASY FOR GROUP ADMINISTRATORS TO USE

Administration of the International Expatriate Dental Program works in much the same way as DeCare Dental's domestic plans—and is designed to eliminate the extra costs and inconvenience many companies face when dealing with multiple benefit plans for overseas-based employees.
